

# WORLD LIVER CONFERENCE 2018

May 25-26, 2018 | New York, USA

## **Transabdominal sonography of the gall bladder & its hepatic & peritoneal perforations**

**Vikas Leelavati Balasaheb Jadhav**  
Dr. D.Y.Patil University, India

**T**ransAbdominal Sonography of the Gall Bladder can reveal Hepatic & ExtraHepatic & Peritoneal Perforations of the Gall Bladder, whether it is impending perforations, frank perforations, sealed perforations, concealed perforations & its complications. It can also demonstrate adhesions in the Gall Bladder Fossa at the Right Upper Quadrant. All these cases are compared & proved with gold standards

like Laparoscopic & Open surgery & endoscopy. Some extra efforts taken during all routine or emergent ultrasonography examinations can be an effective non-invasive method to diagnose primarily hitherto unsuspected Gall Bladder impending perforations, frank perforations, sealed perforations, concealed perforations & its complications, so should be the investigation of choice.
